To be completed by the GP practice

What to do if a child is having an asthma attack

- 1 Help them sit up straight and keep calm.
- 2 Help them take one puff of their reliever inhaler (usually blue) every 30-60 seconds, up to a maximum of 10 puffs.
- 3 Call 999 for an ambulance if:
 - their symptoms get worse while they're using their inhaler this could be a cough, breathlessness, wheeze, tight chest or sometimes a child will say they have a 'tummy ache'
 - they don't feel better after 10 puffs
 - you're worried at any time.
- You can repeat step 2 if the ambulance is taking longer than 15 minutes.
