

Astronaut

How do Astronauts eat and drink?

Because the spacecraft is in space the food astronauts eat would float all around the room, it would be hard to eat in space don't right?

How do Astronauts go to the loo?

In the spacecraft is in a small room and in that room is the toilet:

1. Next the toilet is a grey long tube.
2. Next to the grey long tube is the main part it looks like the one you have at home.

A photograph of astronaut Tim Peake inside the International Space Station. He is wearing a blue flight suit and is holding a blue bag. The background shows the complex interior of the station with various equipment, cables, and structural elements. A semi-transparent white box is overlaid on the left side of the image, containing text about Tim Peake.

Tim Peake

Tim Peake is the first British Astronaut for over 20 years in space. When he blasted off for the International space station on the 15th December 2015. He travelled in a Russian soyuz launched from kazakhstan.

What you need to know to be able to be an Astronaut.

To be an Astronaut you need to know how to speak Russian, scuba dive and have to spend a few days in the wild. To be able to pick things up in the thick gloves they have to wear and medical care.

What is it like in space?

In space it is like a world of cosmos and stars. In space there is 0 gravity so you go floating around the aircraft. In space you have to wear suits with tanks on the back of the suit. The tanks have air in them because in space there is no oxygen. In space there 1,000,000,000,000,000,000,000 stars in space.

THE END
