The Space Race

The space race was created because the Soviet Union launched the first man made satellite into space.

The space race was against the US and the USSR

Then, on December 6th 1957, everyone across the nation tuned in to watch the Vanguard tv threes satellite set off and crash into the ground 2 seconds later!!

The Germans, near the end of WW2, launched a rocket. As soon as they launched that rocket, the US and the USSR collected all of the information and built their own.

space race
